

Biology Minor (5.5 units)

The biology minor focuses on the mechanisms by which organisms regulate life processes, grow and develop, reproduce, and behave. The minor requires 4.5 units representing 100-, 200-, and 300-levels in the biology curriculum, as well as one supporting unit in another science of mathematics. No more than two units taken to satisfy requirement for a major or another minor may count toward the biology minor.
