Structured Reflection for Transformative Learning: Using Sophomore Seminars to Prepare Students for Study Abroad

Kiran Cunningham
Anne Haeckl

Kalamazoo College
Transformative learning...

- is a fundamental change in one’s habit of mind (aka frame of reference or system of meanings or set of taken for granteds).

- involves a continuum through which students move in a spiral sort of way over the entire four years of learning (and beyond).
Six levels of learning along the continuum

1. Knowledge gains
2. Attitude changes
3. Changes in perspective
4. Deepening self understanding (becoming aware of one’s assumptions & ultimately critiquing them)
5. Deepening structural understanding (understanding the structural/theoretical context of the issue/problem/experience)
6. Change in habit of mind
Key to change in habits of mind....

... is the ability to connect
a) one’s experience with
b) a critical understanding of one’s assumptions and
c) a structural/theoretical understanding of the context of the experience.
Structured Reflection…

...Catalyzes movement along the transformative learning continuum by employing intentionally designed exercises, activities, or assignments that help students make connections between

a) assumptions held,
b) experiences encountered, and
c) theories/concepts learned.
Understanding Your Assumptions

Understanding Theories and Concepts

Understanding Your Experiences

New Curriculum at Kalamazoo College

- Eliminated all distributional Requirement
- Graduation requirements
  - Major
  - Language proficiency
  - Senior Independent Project (SIP)
  - 3 Shared Passage Seminars
    - First Year Seminar
    - Sophomore Seminar
    - Seminar Seminar
  - PE
Sophomore Seminar Goals Include:

- To prepare students for cross-cultural experiential learning on study abroad
- To move students forward on their 4-year collegiate journey toward transformational learning
- To master disciplinary subject matter and skill sets
Structured reflection in Sophomore Seminars...

- engages students directly in the work of the seminar classroom while also...

- developing theoretically informed ways of reflective thinking that will...

- help students question assumptions and find connections across cultural boundaries when on study abroad.
An Example from Classics
