DRUG AND ALCOHOL POLICY

Beloit College is a private, coeducation, residential institution of higher education committed to providing a sound liberal arts education that promotes life-long learning and personal growth. The college is committed to maintaining an environment of learning, living and working which is free of illicit drugs and the unlawful use or abuse of alcohol. The unlawful possession, use, distribution, manufacture of, or dispensing of alcohol or illicit drugs by students or employees on college property or as part of college activities is prohibited. Individuals who violate college policies or local, state or federal laws concerning the unlawful possession, use, distribution, manufacture, or dispensing of alcohol and illicit drugs are subject to arrest and/or disciplinary action which may result in sanctions up to and including required treatment and/or expulsion from the college.

Drug Policy
The illegal possession, use, provision, manufacture, or sale of illicit drugs is not allowed in, or by members of, the Beloit College community. The sale or transfer of prescription and look-a-like drugs is also a violation of college policy. Prescription drugs may not be sold or provided to others.

Violation of the college’s Drug Policy may result in the following disciplinary actions: expulsion, suspension and/or the turning of evidence over to local authorities for criminal prosecution. The college’s initial and foremost response to reported or observed violations is counseling, in conjunction with other disciplinary actions.

Students who may be having difficulty with alcohol or drugs are encouraged to seek appropriate counseling. The college counselor(s) and Student Life staff members are available resources for counseling on campus. Conferences with these people are privileged, subject to the ethical standards for counselors and the privacy rules established by FERPA (Family Educational Rights and Privacy Act), and HIPPA (The Health Insurance Portability and Accountability Act).

Violations
The college will respond to reported or observed violations with counseling and/or disciplinary action. Violations of the college’s Drug Policy is considered a very serious matter which may result in expulsion, suspension and/or the turning of evidence over to local authorities for criminal prosecution.

The college will enforce the following regulations, regardless of the status of court decisions:

Violations Include:

Selling, Providing, or Producing Illegal Substances
- Sharing, selling, producing, or reselling any illicit (including prescription) drugs may result in serious disciplinary actions.
- Possession of ingredients (in sufficient quantity) used to manufacture drugs may result in serious disciplinary actions.
• Engaging with external sources to purchase illicit drugs for personal consumption, distribution, or resale will result in suspension or expulsion.
• Inviting off-campus dealers to campus is a serious threat to our community and will result in suspension or expulsion.

Use or Involvement
• Direct or indirect involvement with illegal possession, use, or sharing of any illicit drug may result in disciplinary penalties ranging from warning/counseling or suspension or expulsion.
• Possession of drug paraphernalia (for example hookahs, non-tobacco pipes) is a violation of city ordinance and College policy. Drug paraphernalia is not allowed on campus and if it comes to the attention of staff or security, it will be confiscated and not returned.
• So called “Date Rape Drugs” or drugs intended for or used to incapacitate others (often for the purpose of sexual assault), e.g. Rohypnol (Roofies), GHB, or Ketamine are strictly prohibited by Beloit College. Possession or use will result in suspension or expulsion and the involvement of appropriate law enforcement authorities.

For student information, the list of prohibited substances includes, but is not limited to: alcohol, amphetamines, barbiturates, cannabis (marijuana, hashish), cocaine, depressants, DMT, ecstasy, GHB, hallucinogens, heroin, inhalants, ketamine, LSD compounds, mescaline, methamphetamine, methaqualone, narcotics, opiates, PCP, prescription tranquilizers, psilocybin mushrooms, Rohypnol (Roofies), steroids, stimulants, and other compounds which are illegal except when under a doctor’s prescription.

Sanctions/Consequences

The college will respond to Drug Policy violations with counseling, education, and the college judicial process. The full range of judicial sanctions is possible for any offense. However, the usual sanctions associated with Drug Policy violations may include (but are not limited to) and (and all) of the following:

Counseling/Education
Responses include requiring or recommending a student to:
• meet with a Judicial Officer to discuss the drug use decisions may be student and review of the campus policy.
• research current laws regarding drugs in the community.
• organize educational programming on substance use and abuse.
• seek counseling from a college counselor or a Student Life staff member.
• receive counseling or substance abuse education from a local agency.
• enter a substance abuse treatment facility.

Judicial Action
Any violation of college policy where drugs are an element of the incident may result in more serious disciplinary actions. Violation of the Drug and Alcohol Policy coupled with other violations may be treated as separate offenses with appropriate sanctions for each violation.
In connection with violations of the college’s Drug and Alcohol Policy not involving sale or distribution, referral to the J-Board is optional for a second violation and mandatory for a third violation. Hearing officers may (but are not required to) waive referral to J-Board on third violations, if the student is in treatment or seeking treatment.

Disciplinary actions may include an official warning, disciplinary probation, suspension, dismissal, fines, community service work, and/or referral for prosecution. (See page 77 of the Student Handbook)

If a student fails to complete any imposed sanctions, the Dean of Students or designee, or the Judicial Board reserves the right to take further action.

**Responsibility to the Community**
The Beloit College community aims to share concern for those struggling with substance abuse and supports their decisions to enter counseling or a recovery program. Even so, drug use is not tolerated on campus because individual drug use inevitably affects more than just the individual. Smoke in buildings can impact neighboring residents who have allergies, asthma, and other medical conditions. In addition, dealers brought to campus compromise the safety of the college community. As a member of the community, it is advised to seek help for those you suspect are struggling with drug abuse.

Optional responses for friends and roommates concerned about another individual’s substance abuse include, but are not limited to:
- talking to the friend/roommate about their behavior
- talking to a Resident Assistant
- talking to a counselor
- talking to Student Life staff members

See the Resources section for more options.

## Designated Narcotic under the CSA

- 2 not designated as a Narcotic under the CSA
Resources

We encourage all students to educate themselves about drugs, their effects and the legal issues involved in their possession and/or use. The college library, the health center and student life members can provide further information and resources. This chart has been created in accordance with the Drug Free Schools Act requirement for information and education.

BIENNIAL REVIEW
In order to meet the timely needs of the students at Beloit College and evaluate the policies concerning substance abuse, the college’s drug and alcohol policy will be reviewed every two years by the policy committee of BelCon and/or a biennial review team composed of students, staff and faculty. This revised document is on file in the Dean of Students Office.

Revised August 2012
